Dear Arnold:

I spoke with Steve Olesky of the Robbins Reef Yacht Club, who was able to give me more details on the flotilla part of the demonstration against At-Sea Incineration's Newark tank farm plans. In principle, we would like to be present at the Girl Scouts' waterfront festival in Elizabeth Port in the morning, pick up a group of scouts there and motor over to the flotilla rendezvous point in the early afternoon. The captain has to check out the dock, as we've never used it before; we have to find out who owns the dock and get permission to pull up to it; and finally, the captain has to figure out the physical possibilities within the time constraints.

Final agreement has to wait on these pieces of information, but it looks quite positive. Thanks for getting in touch with us. We'll be talking again soon.

Sincerely,

Carol Cina
Coordinator of Volunteers
